

1. 6 Days E Workshop On Prosthetics And Orthotics In Rehabilitation.

We organized 6 days E Workshop on “Prosthetics and orthotics in Rehabilitation: A complete Guide” from 15th to 20th February 2021 on our zoom platform.

It dealt with types, make, prescription and rehabilitation of Prosthetics and orthotics.

In Day 1 and 2 upper and lower limbs orthotics were covered by Mr Kaushal Kishore, Biomedical Engineer with Walnut Medical pvt ltd. A detailed knowledge of different types of orthotics, material used for making them and rationale behind their prescription was explained by him. Day 3 was taken by Dr Avi Choudhary, Assistant Professor, BCIP, on detailed assessment before orthotic use and role of Physiotherapy after its use. Dr Gaurish Kenkre, Chief Rehabilitation Consultant, Breach Kennedy Hospital, Mumbai gave live demonstration on different orthotics used in different musculoskeletal conditions. On Day 4 and 5 Dr Kaushal Kishore explained different types, materials, uses, indications and contraindications of prosthetics of upper and lower limb. Day 6 included the lecture from Dr Ashok Rath, Director, Orthocare Kolkata in which he explained common gait deviations while using prosthetics of lower limb, assessment of amputee patient along with pre and post prosthetic Physiotherapy rehabilitation. The talk was continued by Dr Davinder Kumar Gaur, Assistant Professor, BCIP, wherein he explained the role of prosthetics in sports.
